DETAILED ACTION

1. *Claims 1-31 have been presented for examination based on applicant's disclosure filed 18 December 2006. Applicants have now cancelled claims 2, 10, and 27. Claims 17-25 are cancelled by the Examiners' Amendment of record below. Claims 1, 3-9, 11-16, 26, and 28-31 remain pending in this application and have now been allowed over the prior art of record.*

EXAMINER'S AMENDMENT

2 *An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.*

Authorization for this examiner's amendment was given in a telephone interview with Mr. Ratlif (for J. Hao) on January 9, 2007.

Amend the claims as follows:

*Claims 17-25 are **cancelled**.*

Correct the dependence of claims 3, 5, and 6 as follows:

*In the first line of claim 3 (now renumbered 2) **delete** the number 2 and **insert** the number 1 after the word "Claim".*

*In the first line of claim 5 (now renumbered 4) **delete** the number 2 and **insert** the number 1 after the word "Claim".*

*In the first line of claim 6 (now renumbered 5) **delete** the number 5 and **insert** the number 4 after the word "Claim".*

Correct the dependence of claim 29 as follows:

*In the first line of claim 29 (now renumbered 17) **delete** the number 27 and **insert** the number 15 after the word "Claim".*

Response to Arguments

3. *Applicant's arguments filed 18 December 2006 with respect to the pending claims have been fully considered and are persuasive.*

Regarding applicant's response to claim objections: The examiner withdraws the claim objection in view of applicant's amendment to the claims.

Regarding applicant's response to 101 rejections: The examiner withdraws the 101 rejections in view of applicant's amendment to the claims and supporting arguments filed 18 December 2006.

Regarding applicant's response to 102/103 rejections: The examiner withdraws the previous 102/103 rejections in view of applicant's amendment to the claims, supporting arguments filed 18 December 2006, and the Examiner's Amendment of record appearing below.

Allowable Subject Matter

4. *Claims 1, 3-9, 11-16, 26, and 28-31 are allowed over the prior art of record.*

The following is an examiner's statement of reasons for allowance:

Applicants are disclosing a method and system for generating a simulated network topology inclusive of a graphical user interface for creating device connections and automatically generating a simulated network based on the devices and connections. This has been disclosed in the prior art of record.

While these elements are individually disclosed in the prior art, the prior art of record does not meet the conditions as suggested in MPEP section 2132, namely:

*"The identical invention must be shown in as complete detail as is contained in the ... claim." Richardson v. Suzuki Motor Co., 868 F.2d 1226, 1236, 9 USPQ2d 1913, 1920 (Fed. Cir. 1989). The elements must be arranged as required by the claim, but this is not an **ipsissimis verbis** test, i.e., identity of terminology is not required. **In re Bond**, 910 F.2d 831, 15 USPQ2d 1566 (Fed. Cir. 1990)."*

*In particular, the prior art does not disclose the specific sequence of steps or arrangement of elements relating to receiving a network topology generated at a graphical user interface and automatically generating a file describing the simulated network topology **in combination with** the elements of accessing a neighbor discovery protocol table for the devices and subsequently compiling the static and connection information into a build file, as now required by independent claims 1, 9, and 26. The closest prior art uncovered during examination teaches certain limitations of the claimed invention as follows:*

- *OPNET Modeler, Product Description: teaches the OPNET Modeler network simulator and modeling tool used for the development and analysis of communications network topology via a GUI based user*

interface. However, OPNET does not explicitly disclose the additional combination of accessing a neighbor discovery protocol table for the network devices and subsequently compiling the static and connection information into a build file as now required by independent claims 1, 9, and 26.

- U.S. Patent 6,714,217 issued to Huang et al: teaches method and system for generating a simulated network inclusive of network topology generated by user interface GUI of network devices, but again, does not explicitly disclose the additional combination of accessing a neighbor discovery protocol table for the network devices and subsequently compiling the static and connection information into a build file as now required by independent claims 1, 9, and 26.

Independent claim 26 further uses “means for” language and is given deference in view of In re Donaldson and interpreted in view of 35 U.S.C. § 112 paragraph 6. The “means for” language and the limitations related thereto of claims 26 us interpreted within the scope of enablement as provided within the relative embodiment provided within applicant’s specification.

The features noted above therefore render the claimed invention non-obvious over the prior art of record. Dependent claims 3-8, 11-16, and 28-31 are deemed allowable as depending either directly or indirectly from independent claims 1, 9, and 26.
